Day 4 of 15 · Self-Check

Day 4 Self-Check Quiz — Data Sources, Databases and SQL Retrieval

Name: _____ Date: _____ Score: _____ / 15

Instructions: Write the letter of the best answer, or the query asked. You have 20 minutes. Passing score: 12/15 (80%).

Part I — Multiple Choice

1. ___ PAGASA's daily temperature table, used by Aling Nena, is:

   A. Internal, structured B. External, structured C. Internal, unstructured D. External, unstructured

2. ___ Which of these is **unstructured** data?

   A. A CSV of sales B. A database table C. Customer voice messages D. An Excel price list

3. ___ A **primary key** is a column that:

   A. Is always a number B. Has a unique value for every row C. Points to another table D. Can be empty

4. ___ In `sales`, the column `product_id` that points to `products.product_id` is a:

   A. Primary key B. Foreign key C. NULL D. Comment

5. ___ `SELECT DISTINCT payment_method FROM sales;` returns:

   A. 500 rows B. Each payment method once C. Only the first row D. An error

6. ___ Which condition finds customers with **no** email?

   A. `email = NULL` B. `email = ''` C. `email IS NULL` D. `email = 0`

7. ___ `WHERE sale_date BETWEEN '2026-02-01' AND '2026-02-07'` includes:

   A. Feb 2 to Feb 6 only B. Feb 1 to Feb 7, both ends included C. Feb 1 to Feb 6 D. Only Feb 1 and Feb 7

8. ___ `WHERE product_name LIKE '%Milk%'` matches:

   A. Only "Milk" B. Names that start with Milk C. Names containing Milk anywhere D. Names ending in %

9. ___ The correct order of clauses is:

   A. SELECT, WHERE, FROM, ORDER BY B. SELECT, FROM, WHERE, ORDER BY, LIMIT C. FROM, SELECT, LIMIT, WHERE D. SELECT, FROM, LIMIT, WHERE

10. ___ `ORDER BY unit_price DESC` sorts the products:

    A. Cheapest first B. Most expensive first C. A to Z D. Randomly

11. ___ In VS Code with SQLTools, the shortcut that runs the **selected** query is:

    A. Ctrl + Enter B. F5 C. Ctrl + E, Ctrl + E D. Ctrl + R

12. ___ The query `SELECT product_name unit_price FROM products;` (no comma) will:

    A. Give an error B. Show both columns C. Show product_name under the heading unit_price D. Show nothing

Part II — Read the result

13. `SELECT * FROM branches WHERE status <> 'Open';` returns how many rows? (Hint: look at the branches table in Part 2 of the handout.) _____

Part III — Write the query

14. Show the name and price of products in the **Snacks** category, cheapest first:

---

15. Show the sale ID and total amount of the **3 biggest Caloocan (BR04)** sales:
