Day 2 of 15 Self-Check

Day 2 Self-Check Quiz — Descriptive Statistics

Name: _____ Date: _____ Score: _____ / 15

Instructions: Write the letter of the best answer, or the value asked. You have 20 minutes. Passing score: 12/15 (80%).

Part I — Multiple Choice

1. ___ Which measure is **least** affected by an extreme value?

   A. Mean B. Median C. Range D. Standard deviation

2. ___ The best "average" for the most popular payment method is the:

   A. Mean B. Median C. Mode D. Range

3. ___ Ninety days of sales are a **sample** of all possible days. Which function gives the standard deviation?

   A. `STDEV.P` B. `STDEV.S` C. `VAR.P` D. `AVERAGE`

4. ___ If the mean is much greater than the median, the distribution is most likely:

   A. Symmetric B. Left-skewed C. Right-skewed D. Uniform

5. ___ The IQR measures the spread of the:

   A. Whole data B. Middle 50% C. Top 25% D. Outliers only

6. ___ Q1 = 14,000 and Q3 = 18,000. The **upper fence** is:

   A. 20,000 B. 22,000 C. 24,000 D. 18,000

7. ___ Branch A: mean ₱20,000, SD ₱2,000. Branch B: mean ₱10,000, SD ₱1,500. Which branch is **more consistent** (lower CV)?

   A. A (10%) B. B (15%) C. Both equal D. Cannot tell

8. ___ The Analysis ToolPak shows **Mode = #N/A** for peso sales because:

   A. The ToolPak is broken B. No value repeats C. The data has text D. Labels were not checked

9. ___ You find a day with very low sales caused by a flood. The best action is to:

   A. Delete it B. Change it to the mean C. Keep it, explain it, and consider the median D. Ignore all statistics

10. ___ Which statement about ToolPak output is TRUE?

    A. It updates automatically B. It is static and must be re-run after the data changes C. It only computes the mean D. It needs internet

Part II — Compute (data: **4, 8, 6, 5, 3, 8, 7**)

11. Mean = _____
12. Median = _____
13. Mode = _____
14. Range = _____

Part III — Excel

15. Write the Excel formula that counts how many values in `B2:B91` are **greater than** the value in cell `F2`:
